

COMPUTERS IN EDUCATION JOURNAL

COMPUTERS IN EDUCATION DIVISION OF ASEE
VOL. 6 NO. 1 JANUARY – MARCH 2015 JOURNAL

CONTENTS

<i>Comparing Student Performance on Computer-Based vs. Paper-Based Tests In a First-Year Engineering Course</i> by Ita, Kecskemety, Ashley and Morin	2
<i>Talking Teams: Increased Equity in Participation in Online Compared to Face-to-Face Team Discussions</i> by Fowler	14
<i>A Pilot Study Exploring Augmented Reality to Increase Motivation of Chinese College Students Learning English</i> by Li, Chen, Whittinghill and Vorvoreanu	23
<i>Development of an Interactive Height Measurement Device Using an Arduino Controller – An Independent Study Project</i> by Cowan and Li	34
<i>Monte Carlo Studies of Ideal Multi-Branched Polymers</i> by Zajac and Bishop	44
<i>Students Perceptions of an Alternative Testing Method: Hints as an Option for Exam Questions</i> by Rogers and Schnepf	49
<i>Design of a Full-Featured Robot Controller for Use in a First-Year Robotics Design Project</i> by Vernier, Wensing, Morin, Phillips, Rice, Wegman, Hartle, Clingan, Kecskemety and Freuler	55
<i>Improving the Affective Element in Introductory Programming Coursework for the “Non Programmer” Student</i> by Whittinghill, Nelson, Richards and Calahan	73
<i>Promoting Computational Thinking Skills in an Emergency Management Class with MIT App Inventor</i> by Shih, Jackson, Hawkins-Wilson, and Yuan	82
<i>Design of On-Line Courses: Implications for Student Time Management</i> by Goodson, Miertschin and Stewart	92
<i>Experienceing The Effects of Clock Transition Times on Clocked Storage Elements</i> by Lu	106
