

COMPUTERS IN EDUCATION JOURNAL

COMPUTERS IN EDUCATION DIVISION OF ASEE
VOL. 7 NO. 4 OCTOBER – DECEMBER 2016 JOURNAL

CONTENTS

<i>Teaching Software Requirements Inspections to Software Engineering Students Through Practical Training and Reflection</i> by Goswami and Walia	2
<i>Enhancement of a Finite Element Analysis Course for Structural Engineering</i> by Navaee and Kang	11
<i>Year Two: Analysis of 3D Technology Impact on STEM Based Courses; Specifically Introduction to Engineering Courses</i> by Perez, Espinoza, Gomez, Pitcher, Anaya, Hemmitt and Nevarez	25
<i>Content Independent Classroom Gamification</i> by Cain, Anderson and Taylor	39
<i>The State-of-the-Art Matrix Analysis for Usability of Learning Management Systems</i> by Aydin, Darwish and Selvi	48
<i>A New Robotics Educational System for Teaching Advanced Engineering Concepts to K-12 Students</i> by Gonzalez and Zalewski	61
<i>A Virtual Laboratory System with Biometric Authentication and Remote Proctoring Based on Facial Recognition</i> by Zhang, Zhang, Chang, Esche and Chassapis	74
<i>A Technical Elective Course in Modeling and Simulation – Teaching the Capabilities and Limitations of Professional-Level Software</i> by Watkins	85
<i>Exploring the Feasibility of an Educational Computer Game as Novel Means of Assessing Problem-Solving Competencies</i> by Grohs, Maczka, Soledad and Bagalkotkar	95
<i>Introducing High Performance Computing to Undergraduate Students</i> by Cui, Wang, Li, Peng and Yalvac	104
