

AVANZATO: Virtual Technology to Support Student Engagement and Collaboration in Online Engineering Courses

world technology will be integrated into course and learning management systems and textbook resources.

Robert L. Avanzato received the B.A. degree in Physics from Temple University, Phila., PA, and the Masters of Electrical Engineering degree and the M.S. in Computer Science degree, both from Villanova University, Villanova, PA.

He is currently an associate professor of engineering at the Penn State Abington campus, Abington, PA. He was an engineer at the GE Advanced Technology Laboratories prior to his position at Penn State. His research interests include mobile robotics, computer vision, artificial intelligence, virtual world technology. Prof. Avanzato is also a member of ASEE and IEEE.
